Showing his Capabilities and Accomplishments.

Volume 1, Number 3. INDIAN TRAINING SCHOOL, Carson City, Nevada, January, 1903.

P -'Do Noi Delay'- D

"If you do,
You will not be encerful,
Get all the good out,
The new "Indian" will tell
You all the happenings,
If you wait,

We regret.
Our relitor has left
The twelfth of December;
And his assistant,
Was laid up with the mamps,
On the twelfth.

. F. The New Indian Will go on the same, If you do not delay All hopes toward Our lovely publication The New Indian.

here as disciplinarian in October has resigned, leaving the "New Indian" again without a guardian.

Ar. Virtue has decided that he should begin in other work for which he has an toclination and that the source ne negative the better. He has been in the service several years and has kept a good record and resigns entirely at his own accord, He has already begun work on The Los Angeles Times, in which we wish him the success he deserves.

Our Dog, 'Cap'

Cap was a dog with a slick and fat body, so that the rain could run off of it, and no bones seickrun on of it, and no bones stick-ing up to make the skin look like a tent or like some stick under a blanket or quilt His head was the shape of an intelli-gent dog with some barb wire scars on it.

Two eyes had he which had he power of seeing objects at a distance. Two flapping ears had he which could catch the sound of a dropping pin And the black nose he had could smell the track he had could smell the track of an, ant Severat large teeth which he had could grind the rabbi abones for a meal The mouth he had could devour a dozen rabbit. He was as smart as any dog-could be and very polite in shak-

ing hands.

When in his younger days he could best a swift race horse

When he got old he was to be cared for, and could not do any swift running and had to take it

He was shot and buried in a comfortable grave and went to rest foerver or ascended to the happy hunting ground

house on the Moapa Indian reserva-tion at once. A portable contage and school house was purchased in New York at a cost of \$2.500 and shipped out, arriving at valiente a few days ago. The freight on the same from New York to Cadente was \$4.000 and it will take about \$4.000 more to pay the freight to Moapa, By the time the outlife's are erected they will cost about \$7.9.0. Pioche Record.

A Legend of my Ancestors

-A Small Family of Four-

Many, many, years ago, there lived in the valley, a small family of four; two boys and their father and mother.

They livel in a teeper covered with the skins of will actually which the two boys had killed. These boys were great hinters in their time of the early days.

Every morning before the sun rose, they would go out into the woods to hunt deer and other wild animals, which their father and mother eat into slices and dried and saved for the cold winter, for the man knea his sons could not go out into the woods in winter to hunt as they could in summer. These two had the power to bring back life to the deal by stepping over them.

The youngest boy was twelve years

He was a bad boy, when ever he He was a bat low, when ever he was sure to get into trouble before he came back. One morning in the fall before the sun rose the two boys started out to hunt for deer. They want along up into a canyon near Carson.

near Carson.

Here they found a little stream of water running down, and they both stopped to rest. They talked

for a-while asking one another which way he thought is the best

to go.

The oldest boy said, "you go on this

The oldest boy said, "you go on the other side, and I'll go this side, and we will meet way up there." His little brother answered and said, "yes brother." So they both started, one on each side.

About noon time the youngest boy saw a camp among the willows, in which lived an old man about 80 years old. This old man was cooking and preparing a dinner for himself. The boy asked if he could have a piece of meat.

The old man gave him a piece and still he was not satisfied, so he asked for a higger piece, telling the old man that he had a brother on the other side of the creek who was yere higgs, so the fellow eff another giece. The boy said, "Ave are on a hinding trin, so I had better 2) and canch up with my brother?

The her started around the old man's trease and stonged, He walked book startly so that the old man could not hear him. He stormed her him the tent and reached for the meat.

The old man turned accord and

could not hear him. He storeed has hind the tent and reached for the meat.

The old man turned around and saw just a little bit, not enough to tell what it was, and every time he reached for the mean the old man saw hom a little move and more until me saw what is was. He then gove argy and killed the boy.

The brother of this how was waiting for his brother to careh no, and won lering where he had gone to. He then left his bow and arrows under a pile of roog and started to look for his brother. He looked around for a wifel and fined by he came to the place and found his brother lying deal on the pround. He steeped over him and the box rose up and they both started up the mountains and male for lake Tahor.

They went over to a place called Incline. Here on the shore the proposed his hope and form the started up the mountains and male for lake Tahor.

They went over to a place called Incline. Here on the shore the bad hong drift which reached do in to the ground.

The box wanted the bady: in a little white they got into a fight.

The box wanted the bady in a little white they got into a fight.

The box wanted the bady in a little white they got into a fight.

The box wanted the bady in a little white they got into a fight.

The hady dragged the box into the lake, here the box for their home. They started back for their home they started back for their home. Here started back for their home is hother started back for their home. Here water kept following them up for the hair, and every time the water nearly touched them he priled out one or two hairs and throw them back, and the water caught up to them. So he three all the

hair back, and the water flowed back in the lake; but part of it that came over the mountain forms a lake which is known as Washoe Lake, S. R. Galoreth.

"The "water-baby"

Extract from the Report of The

Commissioner of Indian Affairs

₩Edi cation

The Report of the Commissioner of Indian affairs expresses the right sen timeot, and it is a pity, all interest in the Indian is not centered in an effort along the lines suggested by him. The following estracts show something of the policy of that office. "There are only two phases of the In-

cian question: One, that the American Inofan snall remain in the country as a sur vial of the aboriginal inhabitants, a study for the ethnologist, a toy for the tourist, a ragra dat the mercy of the State, and a continual pensioner upon the bounty of the people; the other, that he shall be edmeated to work, live, and act as a reputable, moral citizen, and thus become a self-sup-porting, useful member of society.

The latter is the palies of the present administration of Indian a fairs, and if can ried to its legat mate conclusion will settle for all true the "Indian ques ion," Such a settlement will be an honor to the troverme it and a credit to the Indian. He will then pass out of our national life as a painted, feither crowned hero of the novelist to all the current of his free, original American blood to the heart of this great

To elucate the India; is to prepare him for the abo ishment of tribal relation to take his land in severally, and in the sweat of his lines and by the toll of his hands to carve out, as his white brother has done, a home for himself and family,

Practical education is what he most requires the knowledge of how to make a living, eve i un ler a iverse viceumstances The distate is the acquirement of the English language. Without it he is pow eriess to trains at intelligently the ordinary affairs of life, to dispose of the produce of his farm or the increase of his herds. Indian schools are therefore limited in textbook instruction to the ordinary common school branches. Higher mathematics - #Contin : ed #page #4#

-Education-

2. Conthe d from second page . . 25 geometry, and astronomy have no place in the curriculum of schools supported by the Government for Indian children."

"By the issuing of rations and the paynent of annuities, lease money, and grass funds, the incentive to work has been rered, the Government freely giving to the red man that for which the white, the black, and the yellow must toil earley and late. These latter do no work unless compelled by necessity to do so; neither will the Indian. Rations were a necessity in the past, but that day has gone except for the old, infirm, and physically incapacitated. The absurdity of the Government ding hundreds of dollars to educate an Indian to work, then after teaching the necessity, sending, them home to his reservation to be supported in i deness, is all too manifest. It were far better out to e !ueate at all if education is all to be multipled by unwise gratuities.

Give the Indian a white man's chance. Educate him in the radiments of our language. Teach him to work. Send him to what he has been taught or starve. It will It will exterminate the India , but develop a man. Protect him only so far that he may gain confidence in himself, and let wan I civilized conditions do the rest."

"Indian schools are carrying out the above policy in the face of many difficulties. Whether this pulicy is the best, time alone will determine. Results attained at present indicate that is is correct; that pursued through a few generations acquires habits will become fixed and be transmisted by heredity, thus establishing characteristics which distinguish the sta. .. white citizen.

Indian education is hampered on the me side by the misguided, sentimental friendship of those who place the Indian upon too lofty a pinnacle, who contend that the whiteman's treatment of him, in the present and in the past, is cruel and inhuman, and, on the other side, by those who, in their greed for his lands and mey, act upon the old theory, "No good Indian but a dead one." The Indian Office is the target of both these classes, who are prompt on all occasions to rush foward with advice as to the best methods of civilizing these people."

"A great nation or a strong character is not developed in a day; neither is an Indian mad a useful citizen. Slowly must old habits an I customs be eradicate I and new ones formed. A conservative course

is the only safe one. The Indian under the guardianship of his own interests and become self-supporting. That some even, many, Indians who from childhood under of tiovernment sch ols relapse into oid habits is too true; nothing else could be expected. The young of the wild bird. though born in captivity, naturally retains the instincts of free-tom so strong in the parent and beats the hars to secure it. while after several generations of captivity the young bird will return to the cage after a brief period of freedom. So with the Indian child. The first wild redskin placed in the school chafes at the loss of free-tom and longs to return to his williwool home. His offspring retails some of the has its acquired by the parent. These habits receive fresh development in each successive generation, fixing new rules of contact, different aspira i os, and greater nesires to be in touch with the doubt ent

firm but kindly councils, has developed and is developing those characteristics of mind and body which tit him to assume
